SUMMARY

Highly motivated and detail-oriented individual with strong technical skills in Java, Python, and SQL. Proven problem-solving abilities, with a solid foundation in computer science and a passion for delivering innovative solutions. Proficient in designing and developing efficient software applications, with excellent analytical and critical thinking skills.

PROJECTS

- Face Recognition Attendance System** (python)
- Developed a web-based application to automate attendance using face recognition. Utilized Flask for the web framework and OpenCV for face detection and recognition, with data stored in a SQLite database. The system supports user registration through image capture, trains a K-Nearest Neighbors (KNN) model for recognition, and features a user-friendly interface. It enhances accuracy and efficiency in attendance tracking for institutions and workplaces.
- Feedback Management System** (Python, SQL)
- It is a web-based application developed using Python and SQL, designed to capture user feedback on products and services. It features secure user authentication, a rating system, and a comment section for detailed feedback. The admin dashboard allows businesses to manage and analyze feedback, with options to filter by date, category, or rating, and export data for further analysis. The system's secure SQL database stores all feedback data, providing valuable insights for businesses to improve their offerings based on direct customer input.

TECHNICAL SKILLS

Programming Languages: Java, Python, C(Basics)
Tools: Visual Studio
Data Management: MySQL

CERTIFICATES

- Java (Basic)** - Hackerrank
- Python (Basic)** - Hackerrank
- C (Basic)** - Hackerrank
- PCAP: Programming Essentials in Python** - Cisco Network Academy
- SmartCoder** - smartinterviews
